Professional Summary

- Full Stack Web Developer with 3 years of experience delivering scalable, high-performance web applications in the EHS (Environmental, Health, and Safety) domain and POS domain.
- Expertise in Angular, .NET Core, C#, SQL Server, and PostgreSQL.
- Proficient in using the Repository-Service pattern to create maintainable code and ensure clean architecture.
- Skilled at collaborating across teams to deliver high-quality solutions that align with business needs.
- Experienced in implementing secure authentication and Single Sign-On (SSO) solutions using OpenIddict and claims-based identity, along with asynchronous messaging integrations using RabbitMQ.
- Strong track record of backend performance optimization — eliminating N+1 queries, pushing aggregation to SQL, and using pre-aggregated tables and bulk update operations to improve response times at scale.
- Disciplined Git practitioner with hands-on experience in interactive rebase, stash management, conflict resolution, and structured branch/PR workflows across collaborative feature branches.

Technical Skills

Frontend: Angular (incl. Angular 20 signals API), HTML5, CSS3, JavaScript (ES6+), TypeScript, Bootstrap, Reactive Forms, FormControlAccessor patterns

Backend: .NET Core, C#, ASP.NET Core MVC/Web API, RESTful services, Dependency Injection, Middleware, async/await, Generics

Databases: SQL Server, PostgreSQL, Entity Framework Core, LINQ

Authentication & Security: OpenIddict, OAuth2, Claims-based Identity, SSO

Messaging & Integration: RabbitMQ (event-driven, asynchronous messaging)

Reporting & Exports: ClosedXML, iTextSharp (PDF/Excel export architecture), NodaTime

Performance & Data: Query optimization, SQL-side aggregation, bulk update operations, pre-aggregation strategies

Version Control: Git, GitHub, Bitbucket (interactive rebase, stash, branching & PR workflows)

Cloud & DevOps: Azure, CI/CD (Azure DevOps)

Other Tools: Visual Studio, VS Code, SSMS, pgAdmin, Postman

Professional Experience

Software Engineer

Vitreous Patel Processing Pvt Ltd — [Vadodara, Gujarat]

Working at a fast-growing IT and software solutions company based in Vadodara, specializing in web application development and digital technology services.

- Developed and maintained scalable web applications using Angular 20, .NET Core 8.0, and PostgreSQL, focusing on performance optimization, clean architecture, and responsive user experiences.
- Collaborated with cross-functional teams to deliver secure, high-quality enterprise solutions in agile development environments.
- Implemented SSO authentication and authorization using OpenIddict, including secure token issuance and bulk token revocation via optimized, set-based SQL update operations.
- Built and debugged asynchronous messaging workflows with RabbitMQ to support reliable, event-driven communication between backend services.

- Optimized high-traffic API endpoints by eliminating N+1 query patterns, pushing aggregation logic to the database via LINQ GroupBy, and introducing pre-aggregated summary tables with backfill logic.
- Designed a generic, reusable PDF/Excel export architecture using iTextSharp and ClosedXML to standardize reporting across multiple modules.
- Engineered reusable, configuration-driven Angular components (data tables, dropdowns, date-range selectors) leveraging the Angular 20 signals API and the ControlValueAccessor pattern to reduce duplication across feature modules.
- Implemented culture-aware currency and date formatting using Intl.NumberFormat and CultureInfo/NodaTime to support multi-region deployments.
- Followed disciplined Git practices — interactive rebase, stash management, structured branch naming, and conflict resolution — to maintain a clean, reviewable commit history across collaborative pull requests.

Full Stack Developer

Setu Net Private Limited — [Vapi, Gujarat]

- Lead development of a scalable web application for EHS management using Angular and .NET Core Web API.
- Implemented Repository-Service pattern to enhance code maintainability and scalability.
- Worked with SQL Server and PostgreSQL to design and manage EHS-related databases.
- Developed RESTful APIs using ASP.NET Core to integrate business-critical data.

Customer Support Executive

Setu Net Private Limited — [Vapi, Gujarat]

- Contributed to internal tools development for system monitoring and performance visibility.
- Documented technical processes and assisted in troubleshooting system issues.
- Collaborated with teams to ensure smooth operations and identified solutions for technical issues.

Education

Bachelor of Science in Computer Science

SSR College of Arts, Commerce & Science — [Silvassa, D&NH, India]

Savitribai Phule Pune University — [Pune, India]

Graduated: April 2023

CGPA: 82.86

Final Grade: A+

Higher Secondary Certificate (H.S.C.)

Prabhat Scholars' Academy — [Silvassa, D&NH, India]

Board: H.S.C. Board of Gujarat

Percentage: 56.77%

Secondary School Certificate (S.S.C.)

Boon Max English Medium High School — [Vapi, Gujarat, India]

Board: S.S.C. Board of Gujarat

Percentage: 82.67%

Additional Information

Highly passionate about developing software that makes a tangible impact in any domain. Always eager to explore new technologies and frameworks, while being a strong team player in both remote and on-site environments.
